## Tentang Saya

---

I am a college student at Politeknik Negeri Semarang, highly motivated and ready to bring positive energy into the professional world. With my educational background, I have developed a solid understanding of electrical engineering and practical skills necessary to thrive in the industry.

## Pendidikan

---

### 2022 - 2025 | Politeknik Negeri Semarang | D3-Teknik Elektronika

This program shares some similarities with vocational high school (SMK) curricula, but offers more in-depth study, particularly in the field of low-current electrical systems. It covers topics such as PLC operation, programming, maintenance and repair of electronic systems, and PCB design.

### 2019 - 2022 | SMKN 4 Semarang | Teknik Audi Video

This program equips students with a solid foundation in audio-video concepts, low-current electrical systems, maintenance and servicing procedures for audio-video systems, as well as the development and assembly of electronic devices.

## Pengalaman Kerja

---

### 2024 - 2024 | Praktik Kerja Lapangan | CV. Sirobo Indonesia

Responsible for learning and developing projects assigned by the company, as well as designing models for the given projects.

### 2021 - 2021 | Teknisi Magang | JOGLOSEMAR CCTV

Responsible for assisting staff with field tasks, including CCTV installation, site surveys, maintenance and repair. Also supported other duties such as goods delivery and inventory stock-taking.

## Kemampuan

---

**Industrial Automation Technician | Leadership | Time Management**
